

How prices of internet services evolve over time?

Train tickets

We analyse in this second chapter the evolution of the Internet tariffs of the **3 trains** selected:

Train #1: Price constant until 3 months before; big increase in price 2 months before, with back to the original price 1.5 months before; as of then, gradual increase in price. Difference max/min **26%**

Train #2: Almost no change in the price during 3 months before. Only punctual changes not following any trend. Difference max/min **26%**

Train #3: Gradual increase in price until ca. 1 month before, where there is a small decrease; after that, again, gradual increase in price. Difference max/min **62%**
