

# How prices of internet services evolve over time?

## Conclusions

Looking at the different cases analysed, here are some **conclusions**:

- There is **no common trend** on where the maximum or the minimum price is established in any of the three types of services analysed. It is not true that the maximum price is always before the date of the service.
- There are **big differences in the prices** within the 3 months before the date of the service:
  - ✦ Between 20% and 37% in flight tickets.
  - ✦ Between 26% and 62% in train tickets.
  - ✦ Between 8% and 54% in hotel reservations.
- In general, **the prices do not evolve linearly with the time**; therefore, there are other variables that impact price changes, most likely demand and availability.

	Max price... when before?	Min price... when before?	Difference in %
Flight #1	Between 2 months & 1 month	start until 3 months	20%
Flight #2	2 months	1.5 months	37%
Flight #3	1.5 months	3 weeks	36%
Train #1	5 weeks until end	start until 2.5 months	26%
Train #2	3 months	2 months	26%
Train #3	end of review	start of review	62%
Hotel #1	2 months	end of review	54%
Hotel #2	1 month	2 months	35%
Hotel #3	1 month	2 months	8%
