

# Analysis debts of countries

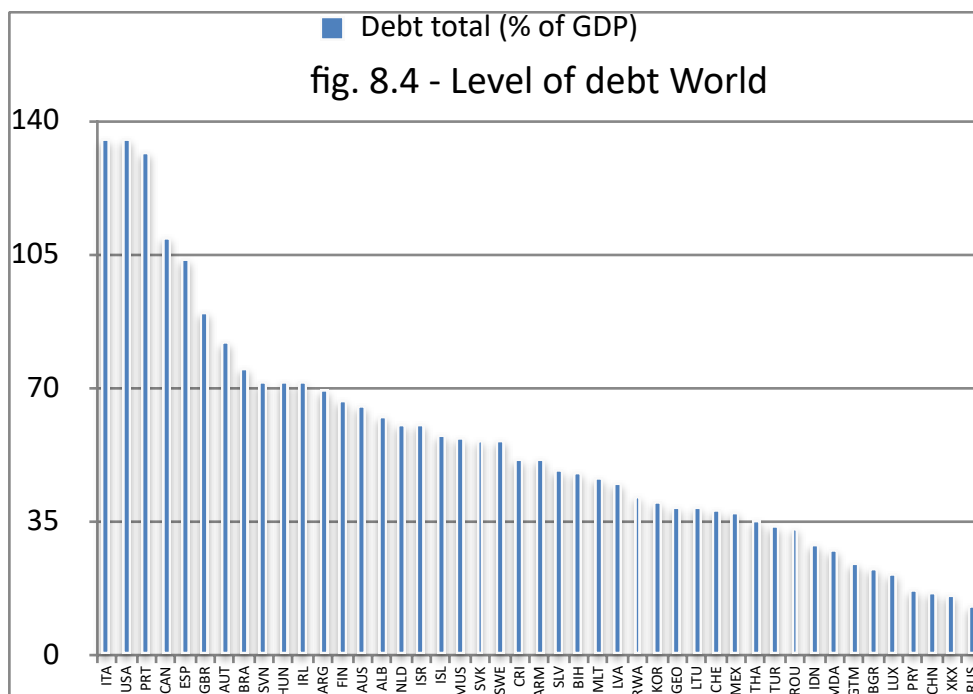

## Level of debt in the World

Unfortunately, the list of countries in scope is not complete; high population countries like Germany, Japan or France are not included. On the countries in scope and considering data for 2018, several countries, i.e., Italy, the US, Portugal, Canada and Spain have an overall debt higher than 100% of the GDP.

In absolute figures (again, on the countries in scope), several countries, i.e., the USA, Italy, Great Britain, China, Canada, Spain and Brazil have an overall debt higher than 1 billion USD.

Table 1

	Debt total (mio USD)
